

Compression Treated

Premium Intermediate Posts

Guaranteed for 15 years

After four years of research and numerous trials we have finally produced a product with a life expectancy of at least 15 years.

Our premium range of intermediate posts are pre-dried below 28% moisture. Treated in a pressurised vacuum unit, they have an uptake of preservative which exceeds 200 litres per cubic metre.

Rough rounded posts (100-125mm diameter posts qualify for grant schemes)

Part Number	Length	Diameter	Treatment chemical	Life Expectancy	Colour
STK1002	1.6m	100-125mm	Celcure AC500	15 years	Dark brown
STK1001	1.6m	75-100mm	Celcure AC500	15 years	Dark brown
STK1006	1.8m	100-125mm	Celcure AC500	15 years	Dark brown
STK1024	1.8m	75-100mm	Celcure AC500	15 years	Dark brown

Machined pencil posts (100mm diameter posts qualify for grant schemes)

Part Number	Length	Diameter	Treatment chemical	Life Expectancy	Colour
STK1025	1.5m	75mm	Celcure AC500	15 years	Dark brown
STK1026	1.5m	100mm	Celcure AC500	15 years	Dark brown
STK1027	1.8m	100mm	Celcure AC500	15 years	Dark brown

About Compression Treating:

The NSAI standard (I.S. 436) demands that preservative penetrates a minimum of 6mm around the circumference of the post. Our posts have a **6mm – 20mm** penetration.

Bales of Premium Intermediate posts are individually labelled. This label provided traceability as to the level of preservative absorbed in the post.
